

April 2023

Dear Jiayu Su,

Congratulations on being a Young Women in Mathematics Awards & Certificates winner!

The Mathematical Association of America (MAA) is thrilled to recognize you for your outstanding achievement in the American Mathematics Competitions (AMC) this cycle. Every year, more than 300,000 students worldwide take our MAA AMC, and you are among the top-scoring young women.

The Young Women in Mathematics Awards & Certificates program started with former MAA AMC student, Meera Desai, wanting to see more students like her in the MAA AMC. This humble vision expanded into a program that now honors hundreds of young women excelling in the MAA AMC, thanks to the generous support of the D.E. Shaw Group, AwesomeMathGirls.org, Two Sigma, Jane Street, and Akamai.

With these awards and certificates, we hope to not only recognize your accomplishments but also build community among young mathematicians like yourselves. Your participation in math is more than your competition score; it has the power to transform communities and classrooms.

We hope you'll continue to pursue your mathematical aspirations and stay connected to the MAA for access to resources, inspiration, and guidance throughout your career.

Warm regards,

A handwritten signature in grey ink, appearing to read "Nicole", written in a cursive style.
